

VINCENTIUS TANUBRATA

PRODUCT MANAGER, GAME DESIGNER, GAME PROGRAMMER

I am a Game Designer and Game Programmer who loves making games. Since I was a kid, I love to get creative by drawing and make a lot of simple games in a piece of paper. Growing up, I learn more about new skills and I met programming, where you can make almost everything through code. So now, I really love to bring up my imagination and combine it with code to make my imagination become a reality!
